HEALTH OF LIVESTOCK DURING APRIL 1950.

In their order of severity, outbreaks of Rinderpest, Black-quarter, Foot and Mouth, Anthrax, Hæmorrhagic-septicæmia, Contagious-gout, Pleuro-pneumonia, Sheep-pox, Ranikhet and Rabies were encountered in the State during April 1950. Rinderpest was encountered in Arkalgud Taluk of Hassan District. Altogether 279 villages were reported to have been affected by one or the other of the contagious and infectious diseases, as against 348 villages during the previous month. The number of outbreaks was highest in Kolar, Bangalore and Chitaldrug Districts, while Mandya, Shimoga and Chikmagalur Districts were least affected. These diseases accounted for 1,751 attacks of which 787 succumbed, as against 3,392 attacks and 689 deaths during the previous month.

The departmental staff undertook 28,725 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease, as against 28,359 inoculations and vaccinations during the previous month. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth disease.

Diseases caused by internal parasites were reported from 136 villages resulting in 69 deaths, as against 199 villages accounting for 119 deaths during the previous month. The special staff attached to the parasitic disease control units and the Sheep Breeders' Associations of the Department dosed 11,189 animals, as against 13,328 animals during the previous month.

The rest of the livestock remained free from diseases during the month, and fodder and water were generally available throughout the State.
